

Do you need to control your critical business documents even after you have sent them to a supplier or customer?

Protect your workgroup or company's documents and keep them under control. With SealPath Enterprise, you will be able to know who within your organization or team has access to important documents that have been protected. You can also find out who outside your organization has access to protected documents and you can revoke access even when the documents are not in your possession. It logs warnings of attempts to access protected documents blocked due to lack of permissions. SealPath Enterprise is designed for small and medium-sized companies or even workgroups within large companies/multinationals.

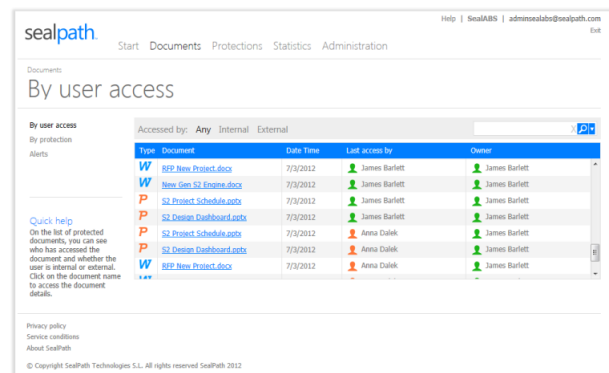

Secure internal/external collaboration

Keep your documents under control when you share them within and outside your organization. Revoke access remotely. Prevent someone who has left the organization or work group from continuing to have access to documents, even if they are on their personal computer or somewhere else.

Reduce risks and legal liability

Avoid financial losses resulting from negligence and data leaks. Comply with the main regulations governing the protection of sensitive data. Gain peace of mind with a tool that gives you significant control over monitoring sensitive documents.

Protect the document	Share It	Work with your regular tools as usual	Monitor the use, Revoke access remotely
<p>Assign Permissions</p> <ul style="list-style-type: none"> View Edit Print Copy & Paste Add Users 			

You remain the owner of your documents, wherever they are

Operational efficiency

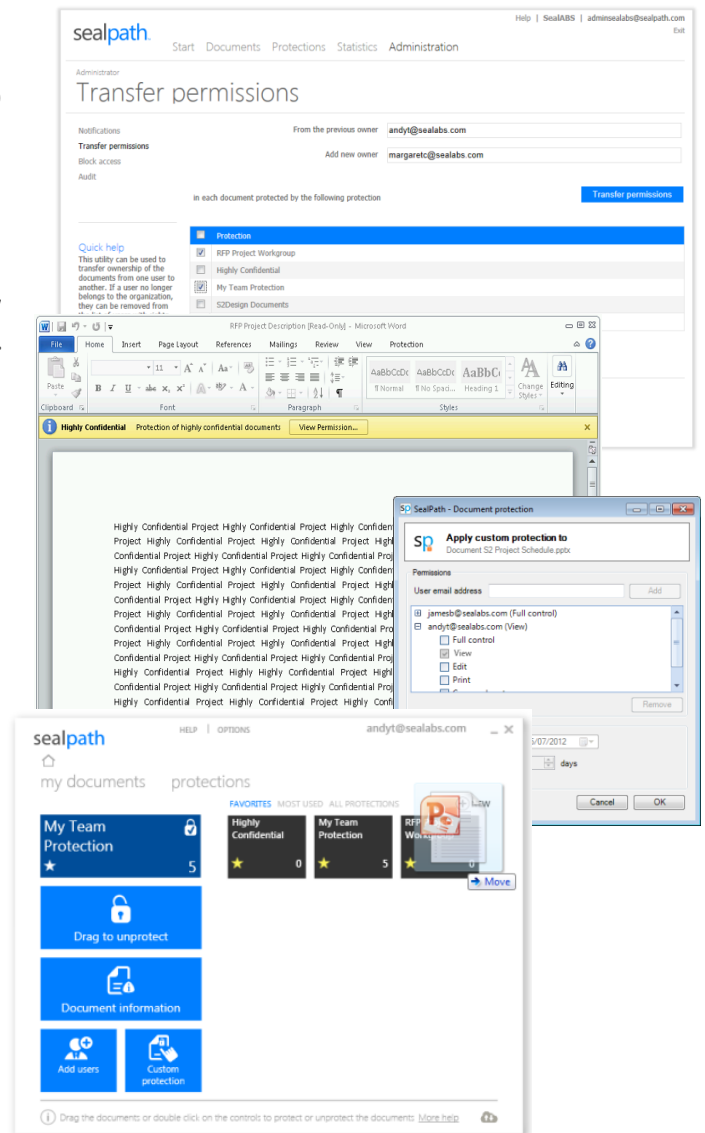

The administrator does not need to be involved for the members of a workgroup to share important documents with third parties. SealPath offers decentralized management, making it easier for departments, teams and individuals to collaborate securely, smoothly and productively, reducing the workload of IT staff.

You don't need to invest in complex infrastructure. We put it on our cloud for you.

Use your regular work tools such as Microsoft Office or Adobe Acrobat to access your protected documents

Protect documents easily without passwords for each document, and the hassle of certificate exchange.

SealPath does not store your documents. Keep them in your favorite public cloud or on-premises.

Make the cloud a more secure place

Keep your documents in any cloud you want, with the confidence that they will only be accessible to the people you choose. Your documents will be under control not only in your private cloud but also in any other private or public cloud.
