

# Deployment Kit

Deploy a backup image across unlimited workstations and servers

Setting up workstations with the right systems, applications, and tools can be a laborious and manual task for technicians and IT administrators.

This is particularly true for organizations that require desktop replication at a huge scale. Organizations can only empower their teams if they can be provided with the equipment and software needed quickly and with minimal friction.

This is where Macrium Deployment Kit comes in: it allows up to 5 technicians to create “master” or “golden” images that can be deployed to an unlimited number of workstations using a USB device (or PXE).

Put simply, it ensures consistent workstation and server environments can be deployed safely at scale with ease.

“One of Macrium’s best features has to be the speed. Suddenly even the largest images could be backed up and restored incredibly quickly, more than twice as fast as our previous supplier.”

## Portable

Deploy a master image to an unlimited number of workstations.

## Consistent

Support all employees with the resources they need.

## Fast

Rapidly return a PC to a known state in seconds.

## Features

### ReDeploy

Move a system disk to new hardware.

### Rapid Delta Restore

Restore data in a fraction of the time.

### File and folder backup and restoration

Restore specific documents quickly.

### Fix boot problems

Fix non-booting machines using rescue media.

## An alternative to Norton Ghost

Deployment Kit is a replacement for Norton's Ghost and GSS products. Neither are now available for purchase and not a safe option for deploying images at scale.

Deployment Kit has a number of significant advantages over Norton's products:

- Modern hardware support AND driver injection
- Bare Metal (USB/CD ISO/PXE) deployment capabilities
- Ultra fast delta restore to return PC to known state

## How to purchase

Talk to your sales representative to purchase Macrium Reflect Deployment Kit.

## System requirements and compatibility

- Reflect will work on Win XP / Server 2K3 and later.
- Appropriate OS level service packs and hotfixes may be required for installation on some Windows versions.
- Some features unavailable on Win7 and earlier.
- Standalone install on Vista (Server 2K8) 64 bit requires specific attention.
- See Macrium Knowledge Base for details.

**Macrium Software** provides comprehensive backup and DR solutions for home or businesses which are used worldwide to protect valuable data and operating systems. Using advanced disk imaging technology Macrium solutions provide fast reliable and easily recoverable images. With many millions of users worldwide, Macrium is a trusted and reliable solution for all data protection needs.
