

TeamViewer IoT at a Glance

Your Global Solution Provider for Remote Connectivity

TeamViewer IoT enables live remote control and real-time incident management for devices and machines. Deployed instantly through the cloud and managed through a common interface, TeamViewer IoT enables organizations to securely connect, manage, and monitor edge devices from anywhere.

Live Remote Control

As if you're in front of the device

Minimal Upfront Investment

Get Connected and online instantly

Real-Time Access to Edge Data

Benefit from our low latency, high performance access to the edge and see what's happening in real time

SaaS Infrastructure at Scale

The TeamViewer Global Access Network already powers over 45 million synchronous connections

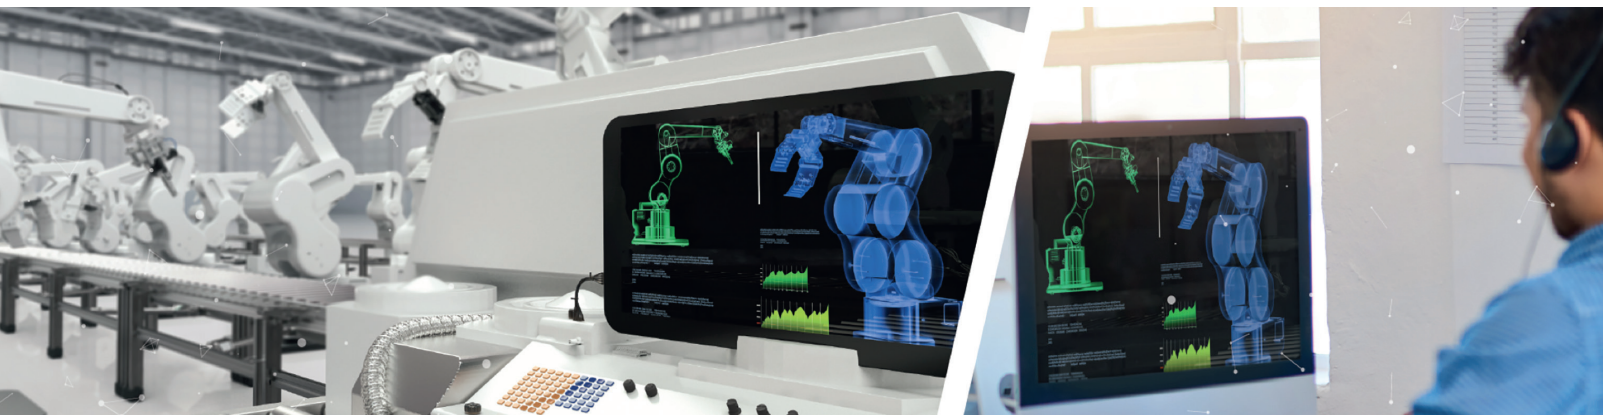

One-click Monitoring and Control

Monitor and control devices on the edge or via the cloud with one solution

Easy Integration with Vertical and Custom Solutions

Open architecture with multiple APIs

TeamViewer IoT Secure Remote Control for Devices and Machines **Instant. Secure. Cost-efficient.**

- ✓ Real-time incident management
- ✓ Instant deployment at scale
- ✓ Minimal upfront investment
- ✓ Cloud interface and dashboard
- ✓ Cloud-based global access network
- ✓ Easy setup, productive in no time

Features and Functionalities

Real-time Data Visualization on the Edge and Cloud

Get a full overview of all your IoT data in one single dashboard in the cloud or on the edge

Multi-Condition Rules and Rule based-Alerts

Set multi-condition rules at specific thresholds for multiple IoT devices and constantly stay up-to-date on what is happening

Remote Screen Grabbing

Remotely capture what is being displayed on an operation panel of any machine, and work as if you were right in front of it

Remote Control on the Edge

With TeamViewer IoT, you have a direct and secure access channel to your edge devices, fully encrypted and without complicated configurations

Ready-to-Use Code Snippets

Ready-to-use code snippets get your IoT solution going in no time

Works Across Multiple Platforms

TeamViewer works across multiple platforms and is cross-platform compatible

Secure Management of Remote IoT Devices

- ✓ Reduce machine downtime
- ✓ Shorten your mean time to repair
- ✓ Lower your service costs
- ✓ Enhance your existing services
- ✓ Create incremental revenue streams
- ✓ Scale innovations fast and cost-effective
