

As a cloud-based remote connectivity platform, TeamViewer Tensor™ enables your company to provide fast, reliable remote support, access and control to hundreds or even thousands of customers' devices at the right moment— all without compromising speed, security, scalability, or reliability. Connect in seconds, remote help is always just a few clicks away.

TeamViewer Tensor™ makes the difference in five areas

Enjoy the following key benefits

- Flexibility in usage thanks to a device-agnostic solution
- Fast deployment as our solution is cloud-based and allow silent mass roll-out
- Time and cost savings: no hardware or maintenance costs, fast ramp up
- Secure connectivity with end to end encryption with 256-bit RSA keys and Single Sign-On
- Reliable platform that contributes to process reviews and audit
- User friendly interface and easy to operate tool
- Services to support your specific requirements

Key Features

01 Single Sign-On Security

The full power of the world's largest connectivity network is now available to integrate with your corporate cloud identity platform. TeamViewer Tensor™ works with any identity provider that uses SAML 2.0 for single sign-on for cloud-based identity and access control.

03 Comprehensive Logging

The advent of the connected workplace has given birth to new kinds of threats and TeamViewer Tensor™ brings a new level of auditability to the enterprise. Now you can audit every connection made to and from PCs to the TeamViewer Tensor™ platform.

02 Device-Agnostic Connectivity

With cross-platform support for MacOS, Linux, and multiple Windows versions and perfect for enterprises who support BYOD (bring your own device) or CYOD (choose your own device) flexibility, TeamViewer Tensor™ provides an added layer of network connectivity with unprecedented simplicity and accessibility to your team, while staying within your corporate security guidelines.

04 Silent Rollout

TeamViewer Tensor™ can be installed and updated silently on all your corporate devices by network admins with appropriate security access. You'll be able to provide interruption-free device and functional support, while keeping all devices in your network humming with the latest software updates.
