

edtFTPnet/PRO

Secure file transfer for the .NET Framework

Companies worldwide rely on edtFTPnet/PRO to securely transfer their confidential files. edtFTPnet/PRO has mature, optimized components packed with features that help .NET developers add FTP, FTPS, and SFTP client support to their applications.

Features include:

- ✓ Robust and proven FTP components
- ✓ Directory transfers and directory synchronization
- ✓ Multiple protocols supported in the one component
- ✓ Multiple, simultaneous transfers by use of FTP connection pools
- ✓ Royalty-free licensing
- ✓ FTPS, SFTP and SCP

You also have the option to purchase the Source Code for the library, allowing you to reduce development time and minimize the human resources needed to create the software.

Tom B - "Happy User" ★ ★ ★ ★ ★

Database Admin/Developer, Education Management
Used the software for: 2+ years

"It was the easiest to integrate to my own applications while providing the secure connections we needed. All integration is done with in-house applications. I don't recall any issues so I do not have any negative comments."

Matthew W - "Solid" ★ ★ ★ ★ ★

IT Director, Logistics and Supply Chain
Used the software for: 2+ years

"Very easy to implement. Once we implemented edtFTPnet/PRO we haven't had any trouble at all. Support for the latest security protocols was built in. It made the transition with our vendors very easy to manage. I don't have anything negative to say. It's a great product."
