# ABOUT FUTUREX

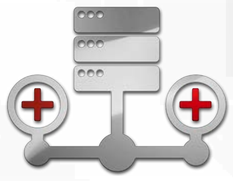
## *Corporate Overview*

Trusted by the largest enterprises and Tier-1 organizations around the world, Futurex has spent the last 40+ years building a reputation for reliable, innovative data security solutions. Throughout every facet of the company, Futurex maintains a focus on providing exceptional customer service, best-in-class technology, and future-minded solutions, giving our customers everything they need to protect their most sensitive data.

*Understanding the diverse needs of our customers, we actively maintain expertise across multiple disciplines including hardware design and development, software and firmware engineering, regulatory compliance and certification, enterprise architecture design, first-to-market custom initiatives, project management, and technical support.*

### Unified Cryptography with CryptoHub

- Unlock the power of unified encryption with Futurex to seamlessly integrate payment and general-purpose encryption.
- Scalability with up to 75 virtual HSMs per host, flexibillity with on-demand modules for any use case, and cutting-edge automation and orchestration.



### Built for Scalability and Expansion

- Our solutions are built with zero reliance on third-party software or hardware.
- We maintain the agility and knowledge necessary to support complex customer environments where our solutions grow alongside your business.

## *Our Technologies*

- ***Hardware Security Modules*** – HSMs for data encryption, validation, and authentication, offering industry-leading speed, functionality, and regulatory compliance
- ***Key, Certificate, and Token Management*** – Turnkey solutions for managing the full key, certificate, and token lifecycle
- ***Post-Quantum Computing Certified*** – Future-proof your security today with our PCI-certified, PQC-ready HSMs
- ***Remote and Centralized Management*** – Configuration and monitoring of your entire system from one remote location
- ***Secure Storage*** – High volume data storage and scalability
- ***VirtuCrypt Hardened Cloud*** – Enterprise-class security services delivered through the VirtuCrypt cloud, powered by award-winning HSMs
- ***Customized, First-to-Market Solutions*** – Hardware, software, and comprehensive encryption as-a-service solutions to fulfill your unique and specific needs

## *About Futurex*

Our dedication to meeting the growing business needs of our global customers and partners is exhibited by the continuous expansion of our innovative products and services through extensive R&D and custom development projects with global Tier 1 organizations. Our products satisfy the most rigorous security requirements, and as we move forward, Futurex will continue to be a global leader in the data security and industry by maintaining high performance standards, providing quality service, and expanding our product suite. Futurex maintains an unyielding commitment to offering advanced, standards-compliant solutions, including:

- HSM solutions for payment and general-purpose data encryption
- Key, certificate authority, and PKI issuance and management
- Secure, high volume data storage for wide-ranging data types
- Vaultless tokenization for compliance scope and cost reduction
- Embedded, small form-factor cryptographic devices
- High availability solutions for remote and centralized management, monitoring, log auditing, and disaster recovery for core cryptographic infrastructure
- Customized solutions for fulfilling unique and complex data security requirements

TOP INNOVATOR ABIresearch. 2025 · TOP IMPLEMENTER ABIresearch. 2025 · LEADER ABIresearch. 2025 · CYBERSECURITY BREAKTHROUGH AWARD 2024 DATA PROTECTION SOLUTION OF THE YEAR · CYBERSECURITY BREAKTHROUGH AWARD 2022 · CYBER SECURITY EXCELLENCE AWARDS WINNER 2023 · CYBER SECURITY EXCELLENCE AWARDS WINNER 2023 · CYBER SECURITY EXCELLENCE AWARDS WINNER 2023

## *Our Methology*

### People

From CTGA-accredited Solutions Architects to dedicated, in-house engineering teams, Futurex employees have the talent, commitment, and expertise to take your organization's data security infrastructure to the next level. and beyond for support throughout the future, Futurex will be there every step of the way.

### Process

Every business is different, which is why Futurex's process for implementing our solutions is designed to cater to your needs. From an in-depth analysis of your system to deployment of custom-developed functionality,

### Technology

Futurex's approach to data security is based around hardened, physically reinforced cryptographic modules that are FIPS-validated. Our PQC-ready unified platform enables seamless integration into infrastructures across every industry, and built-in forward compatibility means that they will be ready for the future.

## *By The Numbers*

**15,000+** Futurex customers worldwide

**40+** Years expertise driving innovation

**16** Data centers across five continents
