

The complete backup and disaster recovery solution

Macrium Reflect 7.1 is the latest release in the Macrium Reflect family of image based backup and disk imaging products. Macrium Reflect 7.1 includes several new features building on the strong Macrium Software reputation for simple, reliable but powerful tools designed for the people who will be using them. Combined with the power of the Macrium Site Manager, Reflect 7.1 is a serious solution for enterprise endpoint backup needs.

New and improved features in Reflect 7.1:

- ✓ **viBoot for very fast DR**
The ability to directly convert a Macrium System Image file into a running VM. Provides instant boot of failed systems for business continuity.
- ✓ **Pre-defined backup plan templates**
The Macrium Reflect scheduling engine is pre-loaded with templates for traditional GFS, Incremental forever or you can create your own custom plan.
- ✓ **Rapid Delta Restore (RDR)**
Using advanced delta detection technology RDR can rapidly recover data from single or multiple full backups. Cuts restore times by 90% or more.
- ✓ **Designed to work with Site Manager 7**
All the Macrium Reflect family are designed to work with Site Manager management console, either as standalone installations or Macrium Agent Licenses.
- ✓ **Macrium Image Guardian**
Provides protection for the backups stored on local and USB attached disks from ransomware attacks. Only Macrium Reflect process are allowed access to the backup files.
- ✓ **Changed Block Tracking (CBT)**
Super-fast incremental and differential backups providing flexibility and for backup scheduling and retention. Great for large systems such as hypervisors and virtual machines.

The software is incredible, Macrium have really outdone themselves! Having this tool in my toolkit certainly makes my life a lot easier.

Macrium Reflect 7.1 Editions.

Macrium Reflect Workstation

Based on our very successful Professional product this new solution is designed for endpoint backup of business critical PC's and workstations. Peace of mind for organisations when backing up Windows PC's.

Macrium Reflect Server

Organisations can relax when they install Macrium Reflect to back up their site's servers. With a long list of outstanding features, this fast and very reliable solution once again sets the standard for image based server backup solutions. Macrium Reflect Server comes with a full set of updated features that provides the fastest time to first backup and peace of mind for full image or file and folder level restores.

Macrium Reflect Server Plus

Macrium Reflect Server Plus is a fully featured and sophisticated tool for backing up the most critical of servers running applications such as Microsoft Exchange email, and SQL databases. IT professionals will be able to very quickly install and run backups using Server Plus.

Macrium Reflect Technicians License

This license arrangement is ideal for IT technicians or service companies who might maintain a large number of PCs and may wish to back them up prior to carrying out work. Using a Technicians license allows the technician to backup or image each PC using a single Macrium Reflect license.

Macrium Reflect Deployment Kit

The Deployment Kit License allows up to 5 technicians to create and deploy images to an unlimited number of workstations and servers.
