INTUNE WITH NERDIO MANAGER FOR MSP

Microsoft Intune is a suite of tools providing cloud-based device management functionality to businesses. Intune is licensed predominantly on a per-user basis, however per-device options are available for shared or kiosk type scenarios. Microsoft Intune provides granular control of your physical and virtual desktops and laptops.

Microsoft Intune is closely linked to Azure Active Directory (AAD), meaning devices added to AAD can also be added to Intune. Application and policy assignments are controlled using AAD groups.

CUSTOMER ENDPOINT MANAGEMENT
Device management, policy & profiles management, app management, Windows Updates, superior troubleshooting tools.

CROSS-TENANT MANAGEMENT
Global policies, track policy drift, import perfected policies, Global apps, Global search, Global views.

FOR MSPs
Purpose built for MSPs, narrows focus to what matters for MSPs in Intune, maximizes margins and eliminates cost overruns with approval workflows, and allows granular access control.

MAXIMIZE YOUR MICROSOFT INVESTMENT
Leverage more of your Microsoft 365 licenses by capitalizing on features already available to you such as AAD, Intune and soon Defender.

Both corporate and personal devices can be enrolled to Intune, with management functionality restricted on personal devices to ensure compliance, but also limit any user privacy concerns.

CLOUD MANAGEMENT PLATFORM
FOR THE MODERN MSP

Nerdio Manager for MSP is a modern, *multi-tenant, workflow-powered* cloud management platform helping MSPs accelerate deployments, *simplify management* across customers, and *increase margins.*

MULTI & CROSS-TENANT	**WORKFLOW POWERED**
SIMPLIFIED & STREAMLINED	**MARGIN ENHANCING**

Nerdio Manager for MSP simplfies Intune for the MSP.

MSPs routinely struggle with app sprawl and an overload of portals to constantly switch between. Nerdio Manager for MSP provides a single pane-of-glass experience across AVD, Windows 365, and physical devices.

Nerdio Manager for MSP's cross-tenant functionality allows MSPs to maximize their margins. Set up once at a global level and apply Intune configurations consistently and easily to all customer accounts. If a one-size-fit-all solution won't work for every customer, Nerdio Manager for MSP allows for customization of individual customer environments at the same time.
